Welcome to FOCUZ MEDICAL

Focuz Medical is an ISO 13485 Certified manufacturer specializing in development of innovative medical devices critical to Gastroenterology, Urology and Interventional Radiology.

Focuz has set up manufacturing facility at Bhatpore GIDC, Surat in Gujarat, with a much improved process technology to strengthen our position in the field of endoscopy accessories.

Mission

“We are focused to combine Medical expertise with Responsible business intelligence to catalyze affordable healthcare”

Vision

“Become a globally recognized and socially respected medical solution provider while leading the way for socially conscious businesses”

Registered Address

Focuz International

204, Narmada Complex
Nr. Kadiwala School
Ring Road, Surat-395002
Gujarat, India.

ABHIMANYU WIRE™-GUIDE WIRE

Green Guide wire with hydrophilic tip

* Abhimanyu guide wire has a floppy tip with excellent lubrication for easy ureter access.

* Abhimanyu guide wire is available with stripe and standard shaft for easy guidance

* Available Size 0.025", 0.032", 0.035"

* Available Length 150 cm

EKLAVYA WIRE™ - GUIDE WIRE

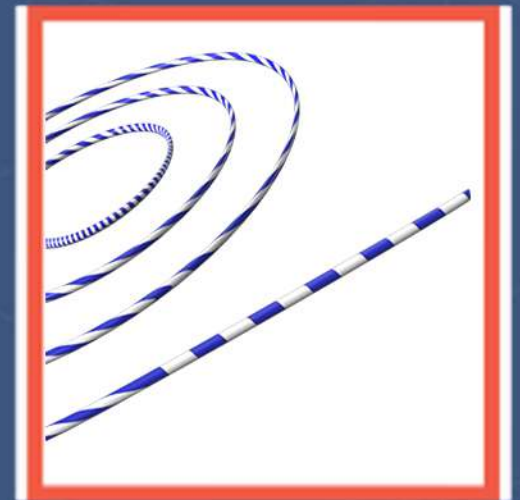

ZEBRA Guide wire

* Eklavya Wire are guidewires with Nitinol core guidewires with blue white zebra type sleeves.

* These guidewires uses Nitinol core with Zebra type PTFE sleeves, designed to provide excellent visualization.

* Available Size 0.025", 0.032", 0.035"

* Available Length 150cm

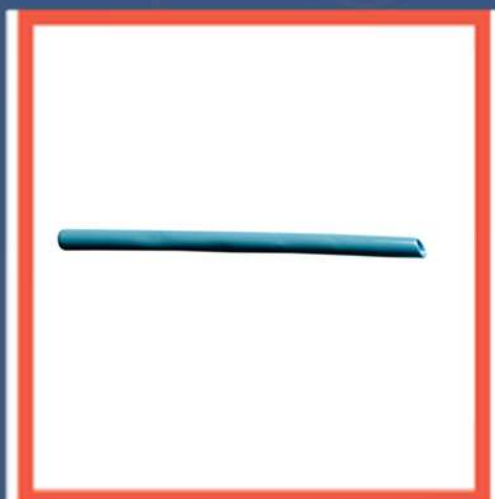

AMPLATZ SHETAH

* Used to maintain previously established nephrostomy tract

* Smooth, angled, bevel tip minimizes trauma

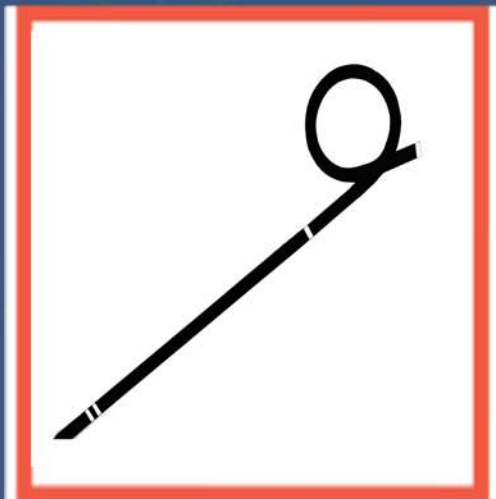

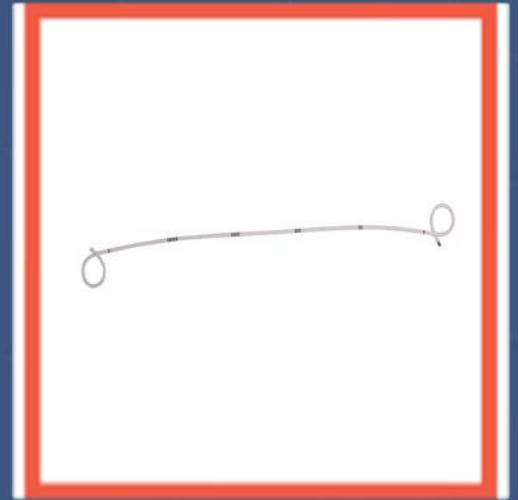

* Radiopaque for easier visualization

DOUBLE PIGTAIL (DJ STENT) – FLOMAX

The URETERAL Stent is intended to facilitate drainage from the kidney to the bladder via placement endoscopically

- * Radio-opaque for better visualization
- * Clear scale on the shaft of stent
- * Big inner diameter, multiple holes for excellent drainage

BLACK SILICON STENT (LONG TERM)

- * Support Kidney to drain urine temporarily, relieving any blockage between the renal-pelvic junction and the bladder
- * Assists kidney in draining stone fragments into the bladder in case of a definitive kidney stone surgery
- * Bio-compatible Material designed for long term stent placement
- * Graduation markings along the body of the stent to confirm placement

ACCESS SHEATH

- * Used to establish continuous working channel thereby reducing ureteral trauma
- * Kink resistant sheath with braided design
- * Radiopaque marker bands with hydrophilic coating for easier insertion
- * Protects delicate instruments and flexible endoscope from damage

MALECOT CATHETER

- * User for percutaneous placement in the renal pelvis for nephrostomy in drainage
- * Highly radiopaque for better visualization
- * Flower design with wings for better anchoring and retention
- * Round tip reduces trauma to the tissue
- * Size: Length 25 & 30 cm
- * Diameter 10Fr, 12Fr, 14Fr, 16Fr, 18Fr, 18Fr, 20Fr

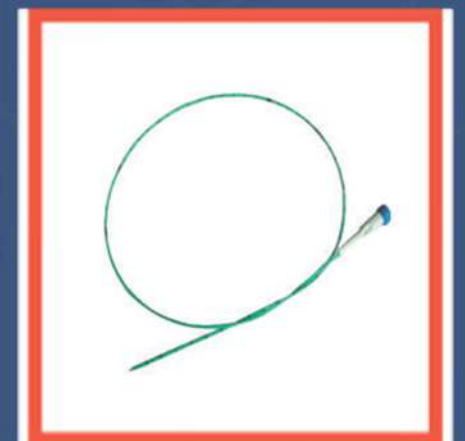

PIGTAIL CATHETER

- * Highly radio-opaque for better visualisation
- * PIGTAIL shaped tip helps in retaining distal tip in Renal pelvis to resist migration
- * Locking tip designed for longer retention
- * Sizes: Diameter 10Fr to 20Fr
- * Length 25 and 30 cm

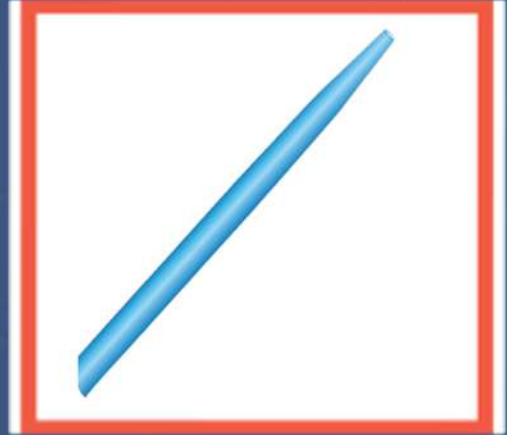

URETERAL CATHETER

- * Flexible open tip design enable easy placement over a guidewire and atraumatic passage into and through the ureter.
- * Step configuration helps in stabilizing the catheter by temporarily merging in and excluding the ureteral orifice.
- * Angle tip allows navigation through torturous curator.

NOTTINGHAM DILATOR

- * User for one step dilation of the intramural portion and ureter
- * Designed to be used over 0.038" guidewire
- * Taper Length 4cm
- * Overall length 60 to 70 cm
- * Diameter 8/4Fr, 10/5Fr, 12/6Fr, 14/7Fr, 16/8Fr

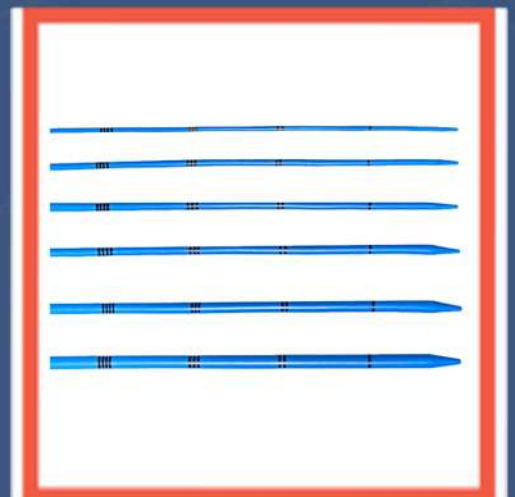

FASCIAL DILATOR SET

- * User for Fascial Dilation
- * Diameter 6Fr, 8Fr, 10Fr, 12Fr, 14Fr, 16Fr
- * Length 22 cm
- * Fascial Dilator set 6-16Fr
- * Product code FDS616F

URETHRAL DILATOR SET

- * User for per-cutaneous suprapubic urinary bladder catheterization to relieve urine retention
- * Comprehensive procedural kit for ease of use
- * Diameter 6Fr to 24Fr Length 40 cm

SCREW DILATORS

- * User for one step dilation
- * Can be used instead of sequential dilation which helps surgeon to do the procedure with minimum blood loss and minimum time

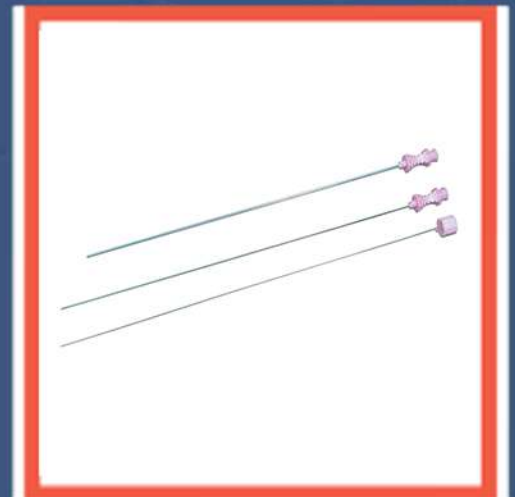

MEATAL DILATOR

- * User for dilation of penile urethral meatus
- * Meatal Dilator Male Size 8-28Fr 9 CM
- * Meatal Dilator Female Size 8-28Fr 7.5CM
- * Meatal Dilator Pediatric Size 6-16Fr 3 CM

IPN NEEDLE

Initial Puncture Needle
Sizes 18G – 15 cm, 20 cm
2 Part / 3 Part

TURP LOOPS

- * Transurethral resection of the Prostate
- * Ball electrodes – 3mm & 5mm 24CH

MALE INCONTINENCE CLAMP

- * Compact and concealable
- * Soft pilable material for patient comfort
- * User for control male incontinence

PENILE CLAMP

- * To control stress incontinence

PATH FINDER

- * For controlled irrigation

UMBILICAL CLAMP

- * For clamping the umbilical cord
